

5th cpu parts

Across

1. a pointing device that you use to input data (hint: not a rat, but a ...)
5. what you use to type letters, numbers and symbols into the computer

Down

2. input device that converts whatever it is on a page as input for the computer (hint: opposite of a printer)
3. printers that spray ink through nozzles onto paper

6. located on the system unit. What you plug the connector into so that data can be transmitted from an input device, such as a digital camera
 8. the main circuit board in the system unit. Contains the memory and processor chips.
 9. prints the information on paper
 10. speakers that rest on your head and cover your ears
 12. the chip that performs all the calculations (hint: central processing unit)
 14. records a photograph as digital code that can be input in to a computer
 15. contains hardware inside it that processes data
 16. input device that inputs sound and converts it to data for the computer
4. output devices for words, music or sounds
 7. the fastest type of printer
 8. stores data and programs in the computer
 11. a storage device that stores the software and data
 13. memory chips that store the data & programs while the computer is turned on (hint: random access memory)
 16. shows you information on a screen
