Evolutionary theory of sleep

Across
2. Suggested the hibernation theory of sleep
6. Suggested when food was hard to find animals slept more
7. Found that species who were prey slept less

Down
1. The issue which suggests that the theory is too simplistic
3. Disagreed with the energy conservation theory
4. Carried out research concerning metabolic rates
5. Suggested that sleep helps to keep animals safe
7. What were most of the studies carried out on which makes us unable to generalize them to humans
