# Meray Energy Puzzle

**Across**

**1.** resource- can be replaced.

**3.** energy- energy from the sun.

**6.** electricity produced from machine run by moving water.

**10.** the total of organism area of volume.

**13.** the process of eroding or being wind water or natural gas.

**14.** movement of energy through sub stains in waves.

**15.** vitality required for sub stained physical or mental activity.

**17.** relating to or resulting from motion.

**Down**

**2.** a major ecosystem define by geography.

**4.** electric energy that travels in waves.

**5.** – energy of place or position high=moves gravitational energy.

**7.** an amount of space between anything.

**8.** using force to move an object distance.

**9.** a natural fule such as coal or gas past from remainder of living organism.

**11.** having or showing the capacity to became or develop of something in the future.

**12.** deposition by water or air.

**19.** resources- cannot be replaced.

**20.** energy – renewable energy from wind.

**22.** the movement of a sub stance from one place to another motion.

**23.** related to or using.

**24.** energy stored in the nuclear of an atom the energy that holds the nuclear together.

**26.** reducing by heat inside earth.

**28.** energy stored in the nuclear of an atom & molecules.

**29.** the vibration or movement of atoms &macular heat.

**16.** of the conservation of energy-

**18.** movement of electrons.

**21.** the action depositing someone.

**25.** energy- energy travels as electromagnetic.

**27.** strength of energy as an attribute of physical action.
