

Mexico's Geography

Across

7. The climate in the northern half of the central plateau.
8. Mountain range that runs along the east.
9. Land that supports about 4/5 of the country's population and is home to several large cities.
10. This region is made up of the coastal plains to the north and south.

Down

1. Has a tropical coastline and is home to many tourist destinations including Acapulco.
2. In Mexico this was first built in the 1950s.
3. The country's capital.
4. These collide resulting in the jagged mountain ranges that stretch along Mexico's shores.
5. What makes up Yucatán's bedrock and is easily eroded by the region's periodic rains.
6. What city is just on the other side of the border with California?
