# 5G will create the condition for new business opportunities

## Across

**3.** Reduced in 5G networks, allowing for real-time applications like remote surgeries and autonomous vehicles.

**5.** The interconnected network of businesses, consumers, and devices that thrive with the deployment of 5G technology.

**7.** Vehicles 5G's low latency and high bandwidth are essential for the development and operation of self-driving cars.

## Down

**1.** Chain Enhanced by 5G's ability to provide real-time tracking and monitoring of goods in transit, improving efficiency and visibility.

**2.** The driving force behind new business opportunities enabled by 5G.

**4.** Computing Enhanced by 5G, it enables faster processing of data closer to the source, optimizing various applications.

**6.** Cities 5G facilitates the development of urban

**10.** Enabled by 5G, it allows for remote healthcare services.

environments with connected infrastructure.

**8.** One of the key features of 5G that enables faster data transfer.

**9.** Reality Enhanced by 5G's capabilities, it opens avenues for immersive experiences in various industries.
