

Earth Science Introduction

Across

- 3. Mixtures of one or more minerals
- 4. The study of the Earth, its history and structure
- 9. The study of the universe; its origin and large scale structures
- 10. Pure substances that form rocks; metals, crystals
- 11. The study of the oceans, both physical and biological
- 12. The study of other planets
- 14. Molten rock found inside of the Earth

Down

- 1. The study of volcanos, how they form and change over time
- 2. The study of the rocks and minerals that make up the Earth
- 5. The study of how climate changes over time
- 6. The study of weather and the atmosphere
- 7. The study of everything beyond Earth; stars, planets, galaxies, and universe
- 8. The study of Earthquakes
- 13. Molten rock found on the surface of the Earth
