

# Einstein's Atomic Theory

## Across

1. Smallest particles in the universe
4. "The father of modern physics."
6. creating energy from atom
9. All matter is defined by space and time
10. Equivalence of mass and energy formula

## Down

2. Anything that takes up space in the universe
3. Distribution of light
5. Movement of particles of matter
7. an idea used to explain a phenomenon
8. group of atoms that forms substance
