

# Inkscape Review

## Across

2. a blend between multiple colors
5. the square points that are created when you click with the pen tool, also known as nodes
7. the tool that lets you add text
9. the name of the vector art software we used in class to create mandalas
12. the menu that you can find Document Setup under
14. the menu that you can find the Layers and Objects panel under
16. the line with round dots at each end that appears when you make a curve with the pen tool
18. the line of tools on the left side of the screen

## Down

1. the boolean operation that allows us to combine two shapes into one
3. the name of the color around a shape
4. the type of curve that the pen tool makes (French word)
6. \_\_\_\_\_ editor, the name of the tool we use to edit paths
8. the boolean operation that only keeps the non-overlapping areas of two shapes
10. the name of the tool we use to trace objects and create straight lines or smooth curves
11. the menu you can find the boolean operations under

- 20. the boolean operation that allows us to cut one shape out of another
- 22. the menu that you can find undo and redo under

- 13. the boolean operation that only keeps the overlapping areas of two shapes
- 15. vector art is infinitely \_\_\_\_\_
- 17. the menu you can find grouping options under
- 19. path \_\_\_\_\_, the panel where you can do things like rotate copies or mirror symmetry
- 21. the name of the color inside a shape
