

Intro to Ecology Vocabulary

Across

2. study of interactions between organisms and the environment
3. lands with water and above water plants
6. upper part of water with light penetration

Down

1. lake with nutrients between poor and rich
4. accidentally or purposefully place in a new environment
5. shallows, most of organisms present

- 7. species that originated or evolved in an area
- 9. nonliving parts of the environment
- 10. lower region of water with no light
- 11. small ecosystems or environmental conditions
- 14. nutrient rich, shallow and warm lake
- 15. distribution of species
- 16. daily conditions in the environment
- 17. large ecosystems with similar climates
- 18. living organisms
- 19. average weather conditions for a period of time
- 8. bottom of ocean
- 12. nutrient poor, very deep, very cold lake
- 13. temperature gradients or layers in a body of water
