

# Patterns in Science

## Across

- 2. Changes you see on the ground each hour of the day
- 4. Moon phase where we do not see the moon in the sky
- 6. Scientists who study weather patterns
- 7. Provides heat for evaporation

## Down

- 1. Cycle where water evaporates and precipitates
- 3. Shows wind direction for airplane
- 5. Measures rainfall
- 6. Takes about one month to orbit Earth
