Across
3. A ratio is the comparison of two quantities by division.
7. Terms Terms with exactly the same variable factors in a variable expression.
10. Inverse The opposite or additive inverse of any number is a ____________.
12. An equation that states a relationship among quantities.
14. The possible values for the input of a relation or function.
17. Any set of ordered pairs.
19. Graph A graph composed of isolated points.
21. Variable A variable that provides the input values of a function.
22. An equation that states that two ratios are equal.

Down
1. The ratio of any length in a scale drawing to the corresponding actual length. The lengths may be in different units.
2. Number A number that is either rational or irrational.
4. Of Operations What is P.E.M.D.A.S?
5. The numerical factor when a term has a variable.
6. A number, variable, or the product or quotient of a number and one or more variables.
8. To substitute a given number for each variable, and then simplify.
9. A symbol, usually a letter that represents one or more numbers.
11. Whole numbers and their opposites.
13. Function A function whose graph is not line or part of a line.
14. Variable A variable that provides the output
