Visual Performance with Simultaneous Vision
Multifocal Contact Lenses

Across
2. CS tests the sensitivity of detection with both large & small details at _______ contrast levels
5. Distance C.S. & distance VA were measured using

Down
1. This lens design offers a gradual change in power from the centre to the periphery
3. The data were analysed using the _______ test
6. This multifocal lens design is only available in RGP lens materials.

7. All subjects included in the study were fitted with high addition ________ multifocal.

9. A total of ________ presbyopic patients were involved in the study.

4. The 3 simultaneous vision lens designs are concentric, aspheric and ________.

5. CS tests provide a better assessment of the px’s ________ vision.

7. Lens centration and ________ are critical in predicting the visual performance of the concentric design MF lens.

8. Near C.S. was measured using the ________ VCTS system.
